ANNUAL REPORTS OF MEDICAL OFFICER OF HEALTH

AND

CHIEF PUBLIC HEALTH INSPECTOR

FOR THE YEAR

1 9 6 4

BOROUGH OF TENTERDEN (KENT)

Annual Reports of the Medical Officer of Health
and the Chief Public Health Inspector for the
Year 1964

Mr. Mayor, Alderman and Councillors,

I have the honour to present to you my Annual Report for the year 1964.

Home Population

The Registrar General's estimate of the mid-year Home Population was 5,250 which represents an increase of 190 over that of the previous year.

Births and Birth Rate

The number of live births was 70 (37 M. 33 F.) an increase of 4 over that of the previous year and the corresponding crude birth rate was 13.33 which after adjustment by the Registrar General's Comparability Factor to allow comparison with the birth-rate of other Districts, becomes 16.66 and was lower than that of 18.4 for England and Wales.

Stillbirths and Rate

One stillbirth (1 F) was registered and the stillbirth rate was accordingly 14.08 compared with that of 16.3 for England and Wales.

Infant Deaths and Mortality Rate

One infant death was registered, due to Prematurity which is the most common cause of infant deaths. The rate was accordingly 14.29 compared with that of 20 for England and Wales.

The hard core of causes of Perinatal Mortality i.e. stillbirths and infant deaths under one week of age, is prematurity, asphyxia and atelectasis, birth injuries and congenital malformations and the chief maternal factor is toxæmia of pregnancy.

Maternal Deaths and Mortality Rate

There were no Maternal deaths, which is a reflection of the high standard of modern Obstetric practice.

Total Deaths and Mortality Rate

The total number of deaths from all causes was 74 (37 M. 37 F.) and the crude death rate was accordingly 14.09, which includes the deaths assigned from the West View Chronic Sick Hospital. The Registrar General's Comparability Factor which is computed from a population standardised for age and sex distribution and allows comparison with other Districts adjusts the crude death rate and the adjustment rate was 7.61 in comparison with that of 12.2 for England and Wales.

The chief group cause of deaths was from natural causes amongst the aged, viz. Heart and Circulatory Diseases and Vascular lesions of the Nervous System; of those there were 44.

Disease of the Coronary Artery of the Heart was the cause of 16 of those deaths or approximately 36% in the following age groups: 1 between 45 - 54; 4 between 55 - 64; 5 between 65 - 74 and 6 over 75 years. The majority of deaths were over 65 years and although the causative factor (or factors) is still obscure, it might be that a degenerative process is one of the principal causes.

Cancer, as invariably in previous years, was the second highest cause of deaths of which there were 11 in the following age-groups; 2 between 45 - 54; 2 between 55 - 64; 4 between 65 - 74; and 3 over 75 years.

Cancer of the Lung and Bronchus was the cause of three deaths (all males) in the following age-group: 3 between 65 - 74 years. These deaths predominate in males and may be related to the ratio of male to female cigarette smokers.

The other causes of death were miscellaneous and there was no exceptional mortality.

The Infectious Diseases

No serious Infectious Diseases were notified during the year.

Measles

54 cases of Measles compared with 194 in the previous year were notified. It is equivocal that it should be notifiable, as it usually is not a serious disease, unless its more serious complications supervene, which now occur less frequently, and for the treatment of which, excepting Acute Encephalitis, the anti-biotics are specific. During epidemics, unnecessary time of busy Practitioners and office staff are taken up by these notifications and the expenditure involved is also unnecessary.

Whooping Cough

Twelve cases were notified. As more and more infants become vaccinated, 'pari passu', the number of notifications diminish.

Scarlet Fever

Four sporadic cases were notified. Today, this is a mild disease in contrast with its virulence in former years, and the majority of cases are treated at home, unless social conditions are unsatisfactory, e.g. caravans.

Tuberculosis

It is noteworthy that no case of non-Respiratory Tuberculosis was notified. Having regard to the fact that this 'White Plague' has been a scourge of man for centuries, the modern progress achieved has been remarkable.

Also, there was no death from Respiratory or non-Respiratory Tuberculosis which is a reflection of the efficaciousness of modern treatment.

In conclusion, it may be stated that the Public Health of the District throughout the year was very satisfactory and may I take this opportunity of thanking you for your assistance and interest in the work of the Department and the staff for their co-operation and efficiency.

I am,

Your obedient Servant,

J. MARSHALL. M.B., Ch.B., D.P.H.

Central Public Health Office,
14, Church Road,
Ashford, Kent.

Tel: No: Ashford 1485

SECTION A.

STATISTICAL AND SOCIAL CONDITIONS OF THE DISTRICT

FOR 1964

Area:- 8,946 acres

Regiatar-General's Estimate of:-

The Resident Population	5,250
Number of Inhabited Houses According to the Rate Books				1,950
Rateable Value	£167,765
Sum Represented by a Penny Rate	£685

SOCIAL CONDITIONS

Tenterden Borough is a corporate member of the Cinque Ports as a Limb of the Ancient Town of Rye, and as such has retained its identity, its historical traditions and characteristic charm.

The Borough is largely a residential district, being surrounded by wide rural areas affords a convenient and good shopping centre. Its chief business interests are associated with those of agriculture, as being the main industry.

SANITARY CIRCUMSTANCES OF THE AREA

WATER SUPPLY

(A) Examination of Water Supplies during the year:-

	<u>Bacteriological Examination</u>			<u>Chemical Examination</u>		
	<u>No. of Samples</u>	<u>Satis- factory</u>	<u>Not Satis- factory</u>	<u>No. of Samples</u>	<u>Satis- factory</u>	<u>Not Satis- factory</u>
Statutory supply undertakings	1	1	-	-	-	-
Private sources piped to dwellings	-	-	-	-	-	-
Other private sources	9	2	7	-	-	-

The quantity of water supplied to the area is adequate and as far as is known none of the supplies are plumbo-solvent.

- (B) (i) Number of dwellings not supplied by public water mains or other adequate piped supplies ... 16
- (ii) Number of dwellings in the area ... 1950
- (C) There were no extensions to water mains during the year
- (D) Action taken in respect of any form of contamination - The problem associated with unsatisfactory, isolated well supplies was receiving attention at the close of the year.

SEWERAGE AND SEWAGE DISPOSAL

Work is in progress for the construction of approximately 11,825 lin. yards of soil sewer to replace existing sewers which will in future be used for surface water drainage. This entails alterations to all house connections.

FOOD (INCLUDING ICE CREAM AND MILK) AND FOOD PREPARING PREMISES

- (i) (a) the number of food premises in the area ... 50
- (b) the number of food premises registered under Section 16 of the Food & Drugs Act, 1955
- (i) Retailers of Ice Cream ... 26
- (ii) Preparation and manufacture of Sausages and Preserved Foods etc. ... 6
- (c) the number of inspections of registered food premises 15
- (d) the method of disposal of condemned food - Deeply buried or burnt.

FOOD AND DRUGS ACT, 1955

Number of inspections of:-

Bakehouses	...	2
Butchers and meat products manufacturers	...	1
Catering Establishment and Clubs	...	2
Dairies	...	-

FOOD AND DRUGS ACT, 1955 (Contd.)

Fish (including fried	...	1

Number of Food Premises improved as a result of notices served ... 10

SUMMARY OF MILK SAMPLING (INFORMAL) for the purposes of Milk (Special Designations) Regulations.

	<u>No. of Samples taken.</u>	<u>No. of Samples which failed</u>
Pasteurised Milk	None	Phosphatase test: M.B. test: Nil.
Sterilised Milk	None	Turbidity test:
Tuberculin Tested (raw)	None	M.B. test:

<u>Biological Examination of Raw Milk</u>	<u>No. of Samples</u>
Retail supplies	None
Others	None

Inspection of Food and Food-preparing premises

Most occupiers of food premises co-operated swiftly to bring their premises up to standard when their attention was drawn to contraventions of the Food Hygiene (General) Regulations, 1960.

The fairly large weight of unsound food surrendered, as can be seen, accounted for mostly by frozen foods. In all instances this was due to a mechanical failure of the refrigerating apparatus.

(ii) MILK AND DAIRIES

(1) Milk and Dairies Regulations 1949 (Part III)
Milk and Dairies (General) Regulations, 1959 (Part III)

No. of registered distributors	...	11
No. of registered dairies	2

INSPECTION OF MEAT AND OTHER FOODS

Unsound Food Surrendered

Fish	...	176 lbs.	Frozen Fish Products	...	244 lbs.
Meat	...	28 "	Frozen Meat Products	...	241 "
Canned Fruit	..	21 "	Frozen Vegetable Products	..	430 "
Fruit	...	17 "	Frozen Fruit Products	...	4 "

Total weight condemned 10 cwt. 2 stones 13 lbs.

HOUSING

(i) No. of families on Council's waiting list at 31-12-64	81
(ii) No. of Council houses built during the year	None
(iii) No. of Private houses built during the year	67

CESSPOOL EMPTYING

This work is done by a private contractor at the property owner of occupiers expense

DRAINAGE

Total number of inhabited houses (including Flats) is	1843
Total number of houses connected to the sewers	1507
Number of houses not connected to the sewers	336
Number of premises connected to cesspools	328
Number of premises with pail closets	8

REFUSE COLLECTIONS AND DISPOSAL

weekly collection is undertaken in central areas of the Borough and fortnightly one in outlying areas.

SALVAGE

A waste paper collection is in operation

DISINFECTION

No disinfection of premises or articles was carried out during the year

DISINFESTATION

The number of houses found to be infested with vermin was as follows:

	<u>Bugs</u>	<u>Fleas</u>	<u>Cockroaches</u>
Council houses	-	-	-
Other houses	-	1	-

Comments:- The one infestation of fleas was of animal origin and the property was quickly disinfested.
